NOTES FROM NURSE ROSE

What's the difference between allergies and anaphylaxis? While they both involve an overreaction of the immune system to a substance, anaphylaxis is sudden, rapid, severe, and almost always involves more than one body system. It can be life threatening and needs to be treated immediately with epinephrine (via epi-pen). Even though some relief may be felt right away, it actually takes 8-10 minutes to prevent progression and worsening of symptoms. That's why it's important for it to be administered as soon as possible and why a second dose is sometimes needed. Lastly, if you're having a severe allergic reaction and not sure if it's anaphylaxis, it is recommended to use your epi-pen. It is safe to do so - and it might even save your life!

Our Middle School classrooms, Science Lab, and Library had interactive panels installed earlier this school year thanks to a grant from the M.I.L. Foundation. Now all of our classrooms are outfitted with top of the line touchscreen panels for our students! We are extremely grateful for M.I.L.'s generosity and continued support of Catholic education. We look forward to the many ways students will learn by using these hands on boards! A very special thank you goes to parent volunteer Brandon Gatton and his co-worker Billy Connelly from AV3, Inc. who so carefully spent time mounting our newest boards!

Justin Berk visited our school yesterday to tell us about his job as a meteorologist! Thank you Justin Berk for coming to visit our school!

faith rally

The Faith Rally is coming! Get your food pantry donation and those faith t-shirts ready to wear on Monday, April 28th, when we come back from Easter break. We'll celebrate our faith with activities, adoration, and a special assembly in the afternoon. Wear those faith shirts with PE bottoms to enter the T-shirt contest! (Regular uniform if you do not wear a faith shirt.)
